

# Pharmacy Compounding Services

## We make it easier for patients to use their medications

Sometimes, patients may require a medication therapy in a strength or easier-to-use form that is not commercially available. Pharmacy compounding lets us partner with you to better meet your patients' unique needs.

Our expert compounding pharmacists can help you provide patient-specific strengths and dosages as well as improve adherence by altering a medication's form to make it easier for your patient to ingest, or adding flavor to make it more palatable.

### We specialize in compounding for many needs:

- \* Free flavoring for pediatric patients
- \* Bio-identical Hormone Replacement Therapy
- \* Customize mouth wash
- \* Dermatology
- \* Alternate dosage forms for kids.
- \* Ophthalmic and otic
- \* Chronic pain management
- \* And many more

## Our expert compounding pharmacists provide an array of specialty compounding services

### We use compounding to support your treatment recommendations:

- Alternative delivery methods: liquid suspensions, transdermal gels
- Changing an ingredient to which a patient is allergic
- Attaining a specific strength and dose (e.g., for babies)
- Flavoring medications for children or pets
- Accommodating patients with disabilities or medical conditions
- Creating medications for patients whose drugs are no longer being produced by pharmaceutical firms
