

## Health Screenings and Wellness Services

### Helping our community stay healthy with a range of services

As local healthcare leaders, we are concerned about both the well-being of our community members and the health risks that may affect them and their loved ones. Many patients don't schedule check-ups as regularly as they should, and our pharmacy often becomes the first point of care.

The screenings and other wellness services we offer provide patients with a convenient and affordable opportunity to help detect, prevent and better monitor common chronic conditions. Our trained pharmacists and staff also offer medication consultations, education and other supportive wellness services.

#### Convenient and affordable services

- Glucose, cholesterol or blood-pressure screenings
- Diabetes-meter upgrades and education days
- Patient education and disease-management classes

Please be aware that we may be referring patients to you for further evaluation, formal diagnosis and treatment following these activities.
